Project Location: Martin Branch Rd., Triplett Branch Rd., Chimney Rock Rd., Crimson Rd., Charity Lane, and Upper Mill Creek Rd., Hindman, KY 41822
GPS Coordinates: Latitude 37°23’50.997” N Longitude -82°54’28.533” W

Description of the Proposed Project [24 CFR 50.12 & 58.32; 40 CFR 1508.25]:

This project will extend water to 68 residences located across six currently unserved roads adjacent to the City of Hindman. Many of these residents are purchasing drinking water due to different circumstances including but not limited to summer droughts and holidays, as well as having polluted well water. The project will:

- Install a hydropneumatic pump and approximately 4200 LF of 4" PVC and 500 LF of 2" PVC along Martin Branch to serve 10 households.
- Install approximately 2,050 LF of 4" PVC and 500 LF of 2" PVC along Triplett Branch Road to serve 6 households.
- Install a hydropneumatic pump station and approximately 2,900 LF of 4" PVC and 750 LF of 2" PVC along Chimney Rock RD to serve 9 households.
- Install approximately 1,200 LF of 4" PVC and 250 LF of 2" PVC along Crimson Road to serve 7 households.
- Install approximately 8,450 LF of 4" PVC and 250 LF of 2" PVC along Upper Mill Creek to serve 30 households.
- Install approximately 650 LF of 4" PVC and 250 LF of 2" PVC along Charity Lane to serve 6 households.

Telemetry will be installed on the two hydropneumatic pump stations as well as upgrading the SCADA system wide on all existing tanks and pump stations as the system has become obsolete. All costs of SCADA have been incorporated into the ARC portion of the project.

**Statement of Purpose and Need for the Proposal** [40 CFR 1508.9(b)]:

The purpose of the Hindman Waterline Extension Project is to bring reliable water service to 68 residents living in an area of Knott County that has no reliable source of potable water. The residents in this project area currently have well water which is subject to going dry during summer droughts. Many residents are forced to purchase drinking water due to circumstances including summer droughts and polluted well water. This project is needed to insure reliable and efficient water service to an unserved area of the county and will improve the overall health of the residents in the project area.

**Existing Conditions and Trends** [24 CFR 58.40(a)]:

The project is located in various locations in Knott County, Kentucky. The decline in the coal industry in recent years has resulted in the loss of coal related jobs and coal severance tax revenue. The recent Covid-19 Pandemic has also caused job loss and economic stress for many of the residents in the project area. Alternatives were considered which included to do nothing. This alternative would not allow the residents to have a reliable, potable water source. The preferred alternative of installing waterlines to serve the 68 households will allow residents to have a reliable, potable water supply which will improve their quality of life.

The City of Hindman does participate in the National Flood Insurance Program. The City of Hindman has completed the eight-step process per the required 24 CFR 55 since a section of the water project appears to be located within the bounds of the 100-year floodplain. The Floodplains and Wetlands Early Public Notice ran in the April 2, 2020 edition of the Troublesome Creek Times. The Floodplain and Wetland Notice of Explanation ran in the April 30, 2020 edition of the Troublesome Creek Times. No public comments were received.

| Endangered Species                                          | ☐   | ☒  | No Impact. According to Jennifer Garland letter dated April 7, 2020, “Significant impacts to federally-listed species are not likely to result from this project as currently proposed.” According to Doug Dawson, KDFWR, in a letter dated April 23, 2020 indicated “due to the location and nature of the project, KDFWR does not believe the project will impact any federal or state-listed threatened/endangered species or any associated critical habitats. No critical areas, wildlife preserves or other significant ecological areas will be impacted by the proposed project.” “To minimize indirect impacts to the aquatic environment, the KDFWR recommends that erosion control measures be developed and implemented prior to construction to reduce siltation into waterways located within the project area. Such erosion control measures may include, but are not limited to silt fences, staked straw bales, brush barriers, sediment basins, and diversion ditches. Erosion control

No Impact. Per Army Corps of Engineer comments dated June 18, 2020 “Based on the information submitted, it does not appear that a permit would be required for the above referenced project.” There were no wetlands located near the identified project area. The City of Hindman has completed the eight-step process per the required 24 CFR 55 since a section of the water project appears to be located within the bounds of the 100-year floodplain. The Floodplains and Wetlands Early Public Notice ran in the April 2, 2020 edition of the Troublesome Creek Times. The Floodplain and Wetland Notice of Explanation ran in the April 30, 2020 edition of the Troublesome Creek Times. No public comments were received.

### Wild and Scenic Rivers

<td></td>
</tr>
</tbody>
</table>

No Impact. The project will benefit all area residents regardless of any protected class. The City of Hindman is an equal opportunity provider and will serve all potential customers equally.

---

**Environmental Assessment Factors** [24 CFR 58.40; Ref. 40 CFR 1508.8 &1508.27] Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

**Impact Codes:** Use an impact code from the following list to make the determination of impact for each factor.

1. Minor beneficial impact
2. No impact anticipated
3. Minor Adverse Impact – May require mitigation
(4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

- KY River ADD, Jennifer McIntosh
- KY Transportation Cabinet, Jason Blackburn
- KY Heritage Council, Yvonne Sherrick
- Division of Water, Benjamin Currens.
- KY Fish and Wildlife, Dan Stoelb
- Division of Enforcement, Tim Harrod
- Army Corps of Engineers, Justin Branham

**Public Outreach [24 CFR 50.23 & 58.43]:**

- April 2, 2020 Floodplains and Wetlands Early Public Notice Activity in a 100-year Floodplain
- April 30, 2020 Floodplain and Wetland Notice of Explanation Activity in a 100-year Floodplain
- July 23, 2020 Combined Notice to Public of No Significant Effect on the Environment and Notice to Public of Request for Release of Funds

**Cumulative Impact Analysis [24 CFR 58.32]:**

It is highly anticipated that the project will have a positive impact on the proposed area by providing a dependable water system for area homes. The City of Hindman has determined that the project will have no significant impact on the human environment. Erosion and sedimentation control will be required as needed. No significant adverse impacts to federally listed endangered or threatened species are anticipated.

**Alternatives [24 CFR 58.40(c); 40 CFR 1508.9]**

Alternative 1: Phase the project into two separate phases. This would not be feasible due to budget limits and the amount of time it would take.

Alternative 2: Allow KCWS to serve customers, which would increase project costs due to adding interconnect meters. This would not be feasible as the budget would not allow adding interconnect meters.

Alternative 3: Construct the project as proposed. This is the selected alternative because it’s the most economically feasible alternative to serve these customers.

**No Action Alternative [24 CFR 58.40(c)]:** This is the least preferred alternative of doing nothing.

**Summary of Findings and Conclusions:** The proposed project will have an overall positive environmental impact. All required mitigation actions must be strictly adhered to.
Mitigation Measures and Conditions [40 CFR 1505.2(c)]

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

<table>

Determination:

☒ Finding of No Significant Impact [24 CFR 58.40(g)(1); 40 CFR 1508.27]
The project will not result in a significant impact on the quality of the human environment.

☐ Finding of Significant Impact [24 CFR 58.40(g)(2); 40 CFR 1508.27] The project may significantly affect the quality of the human environment.

The project will:
• 68 unserved households will have access to potable water supply.
• Installation of new water line – 21,950 LF (19,450 LF on 4” PVC and 2500 LF of 2” PVC).
• Installation of 2 hydropneumatic pump stations.
• Updated SCADA telemetry and office computer will result in more efficient system operations
ENVIRONMENTAL CERTIFICATION

With reference to the above projects, I, the undersigned officer of the grantee, certify:

That the grantee has at least seven (7) days prior to submitting this request for release of funds and certification, published and disseminated in the manner prescribed by 24 CFR 58.43, a notice to the public (a copy of which is attached) in accordance with 24 CFR 58.70;

That the applicant has fully carried out its responsibilities for environmental review, decision-making and action pertaining to the project named above; that the applicant has complied with the National Environmental Policy Act of 1969; that the applicant has complied with environmental procedures, permit requirements and the statutory obligations of the laws cited in 24 CFR 58.5(a)(2); and that the applicant has taken into account the environmental criteria standards, permit requirements and other obligations applicable to the project under the other related laws and authorities cited under such laws and in 24 CFR 58.5;

That the level of environmental clearance carried out by the applicant in connection with the said project ( ) did (X) did not require the preparation and dissemination of an environmental impact statement;

That the dates upon which all statutory and regulatory time periods for review, comment or other response or action to this clearance began and ended as indicated below; that all such dates which are applicable to this aforesaid clearance are indicated below; and that the expiration of each of the time periods indicated below, applicant is in compliance with the requirement of 24 CFR Part 58:

Clearinghouse Comments
July 23, 2020

Mayor Tracy Neice  
City of Hindman  
PO Box 496  
Hindman, KY 41822

RE: Hindman Waterline Extensions  
WX21119011  
SAI# KY201902130133  
CFDA# 14.219, 23.002

Dear Mayor Neice:

Pursuant to your request, the State Clearinghouse will update its evaluation of SAI# KY201902130133. The State Clearinghouse has contacted appropriate state agencies and determined its previous comments regarding this proposal are still valid.

Please consider this correspondence as official notification that the State Clearinghouse is reaffirming its previous correspondence. This endorsement remains valid for a period of one (1) year from the date of this letter.

If you have any questions regarding this matter, please feel free to contact the State Clearinghouse at 502-573-2382.

Sincerely,

Lee Nalley  
Kentucky State Clearinghouse
March 8, 2019

Mayor Tracy Neice
City of Hindman
PO Box 496
Hindman, KY 41822

RE: Hindman Waterline Extensions
   WX21119011
   SAI# KY201902130133
   CFDA# 14.219, 23.002

Dear Mayor Neice:

The Kentucky State e-Clearinghouse is the official designated Single Point of Contact (SPOC) for the Commonwealth pursuant to Presidential Executive Order 12372, and supported by Kentucky Statutes KRS 45.03. The primary function of the SPOC is to streamline the review aforementioned process for the applicant and the funding agency. This process helps in vocalizing the statutory and regulatory requirements. Information in the form of comments, if any, will be attached to this correspondence.

This proposal has been reviewed by the appropriate state agencies in the e-Clearinghouse for conflicts with state or local plans, goals and objectives. After receiving this letter, you should make it available to the funding agency and continue with the funding agencies application process. This e-clearinghouse SPOC letter signifies only that the project has followed the state reviewing requirements, and is neither a commitment of funds from this agency or any other state or federal agency. Please remember if any federal reviews are required the applicant must follow through with those federal agencies.

The results of this review are valid for one year from the date of this letter. If the project is not submitted to the funding agency or not approved within one year after the completion of this review, the applicant can request an extension by email to Lee.Nalley@ky.gov. If the project changes in any way after the review, the applicant must reapply through the eclearinghouse for a new review. There are no exceptions.

If you have any questions regarding this letter or the review process please contact the e-Clearinghouse office at 502-573-2382, ext. 274.

Sincerely,

Lee Nalley, SPOC
Kentucky State Clearinghouse

Joel Murphy - Endorse with Comments
The proposed project is subject to Division of Water (DOW) jurisdiction because the following are or appear to be involved: water lines and appurtenances. Prior approval must be obtained from the DOW before construction can begin. The applicant must cite the State Application Identifier (SAI #KY201902130133) when submitting plans and specifications.

This project will extend water into several unserved areas adjacent to the City. The project will install approximately 4200 linear feet of 4-inch PVC and 500 linear feet of 2-inch PVC along Martin Branch to service 20 households. A hydropneumatic pump station will be required. Project will install approximately 2,050 linear feet of 4-inch PVC and 500 linear feet of 2-inch PVC to service 6 households on Triplett Branch Road. Chimney Rock Road has the potential for 14 households to be served utilizing 2,900 linear feet of 4-inch PVC and 750 linear feet of 2-inch PVC and hydropneumatic pump station. The project also includes 1,200 linear feet of 4-inch PVC and 250 linear feet of 2-inch PVC to service approximately 7 households at Crimson Road. Upper Mill Creek will have approximately 8,450 linear feet of 4-inch PVC and 250 linear feet of 2-inch PVC for its 30 households while Charity Lane will have approximately 650 linear feet of 4-inch PVC and 250 linear feet of 2-inch PVC for its 6 households. The Supervisory Control and Data Acquisition (SCADA) in the system needs to be updated as it has become obsolete. This will be done system wide to all tanks and pump stations.

There are no objections to the proposed project. Plans and specifications along with hydraulic analysis of the proposed project (including pump curves and its design information etc.) must be submitted to the DOW’s Water Infrastructure Branch by a registered professional engineer in Kentucky. The applicant must receive a written approval from the DOW prior to the beginning of the construction. Questions should be directed to Abbas Pourghasemi, Water Infrastructure Branch, (502) 782-7041, Abbas.Pourghasemi@ky.gov.

As the system expands, the need for a second certified distribution operator is even more imperative. Additionally, as of the most recent Sanitary Survey (March 2018), both water purchase contracts were expired and new contracts had not yet been agreed upon. Ensure the maximum contracted monthly water purchase amounts will allow for this expansion. If not already signed, consider including water quality standards at the master meters within the purchase contracts, as well. System received a non-significant deficiency as a result of the aforementioned survey. A response was due June 21, 2018 and has not yet been received by the Division. This must be addressed immediately. The system was also lacking managerial and financial capacity. Therefore, recommendations listed within the Sanitary Survey results letter (dated May 7, 2018), which have not already been implemented, are still highly advised. Questions should be directed to Jennifer Taimi, Water Infrastructure Branch, (502) 782-7087, Jennifer.Taimi@ky.gov.

This proposed project is not within a designated Source Water Protection Area. This proposed project may potentially add approximately 0.016-0.020 Million Gallons per Day (MGD) of water usage demand. Knott County Water and Sewer District should have the capacity to provide the water demand associated with this project for Hindman Municipal Water Works to purchase. Questions should be directed to Chloe Brantley, Watershed Management Branch, (502) 782-6898, Chloe.Brantley@ky.gov.

Only the Martin Branch portion of the proposed project is within the floodplain. For pipeline stream crossings that are not covered under 401 KAR 4:050, a Kentucky DOW Application for Permit to Construct Across or Along a Stream must be submitted. Questions should be directed to Ron Dutta, Water Resources Branch, (502) 782-6941, Ramendra.Dutta@ky.gov.

Best management practices should be utilized to reduce runoff from project construction activities into nearby waters. Questions should be directed to Andrea Fredenburg, Water Quality Branch, (502) 782-6950, Andrea.Fredenburg@ky.gov.
Endorse. Questions should be directed to Daniel Fraley, Field Operations Branch, (606) 783-8655, Daniel.Fraley@ky.gov.

The Division of Enforcement does not object to the project proposed by the applicant. Questions should be directed to Tim Harrod, Division of Enforcement, (502) 782-6858, Timothy.Harrod@ky.gov.

The proposed work is endorsed by the Groundwater Section of the Watershed Management Branch. However, there are domestic groundwater water well users in the vicinity of the proposed work. It is our recommendation that site be made aware of the requirements of 401 KAR 5:037 and the need to develop a Groundwater Protection Plan (GPP) for the protection of groundwater resources within that area. Questions should be directed to Kurtis Spears, Watershed Management Branch, (502) 782-7119, Kurtis.Spears@ky.gov or David Jackson, Watershed Management Branch, (502) 782-6986, DavidA.Jackson@ky.gov.

If the construction area disturbed is equal to or greater than 1 acre, the applicant will need to apply for a Kentucky Pollutant Discharge Elimination System (KPDES) storm water discharge permit.

Utility line projects that cross a stream will require a Section 404 permit from the US Army Corps of Engineers and a 401 Water Quality Certification from DOW.

The Kentucky Division of Water supports the goals of EPA’s Sustainable Infrastructure Initiative. This Initiative seeks to promote sustainable practices that will help to reduce the potential gap between funding needs and spending at the local and national level. The Sustainable Infrastructure Initiative will guide our efforts in changing how Kentucky views, values, manages, and invests in its water infrastructure. This website, www.epa.gov/waterinfrastructure/, contains information that will help you ensure your facility and operations are consistent with and can benefit from the aims of the Sustainable Infrastructure Initiative.

**Division of Enforcement**
Tim Harrod

The Division of Enforcement does not object to the project proposed by the applicant.

Tim Harrod, Enforcement Specialist

Fish and Wildlife
Dan Stoelb

To minimize impacts to the aquatic environment the Kentucky Dept. of Fish & Wildlife Resources recommends that erosion control measures be developed and implemented prior to construction to reduce siltation into waterways located within the project area. Such erosion control measures may include, but are not limited to, silt fences, staked straw bales, brush barriers, sediment basins, and diversion ditches. Erosion control measures will need to be installed prior to construction and should be inspected and repaired regularly as needed. Please contact Dan Stoelb @ 502-892-4453 or Daniel.Stoelb@ky.gov if you have further questions or require additional information.

Housing Building and Construction
Carlos Spicer

The Department of Housing Buildings and Construction, Division of Building Code Enforcement, has no comments concerning the proposed project.

Kentucky Division of Water
Chloe Brantley

This proposed project is not within a designated Source Water Protection Area. Questions should be directed to Chloe Brantley at 502-782-6898 or Chloe.Brantley@ky.gov.

This proposed project may potentially add approximately 0.016-0.020 Million Gallons per Day (MGD) of water usage demand. Knott County Water & Sewer District should have the capacity to provide the water demand associated with this project for Hindman Municipal Water Works to purchase.

Only the Martin Branch portion of the proposed project is within the floodplain. For pipeline stream crossings that are not covered under 401 KAR 4:050, a Kentucky Division of Water Application for Permit to Construct Across or Along a Stream must be submitted. Questions should be directed to Ron Dutta at 502-782-6941 or Ramendra.Dutta@ky.gov.

This project was reviewed in the WRIS Portal by KIA staff.

Kentucky River ADD
Jennifer McIntosh

KY River ADD had reviewed the project and it matches the project profile submitted to the WMC. The ADD asks that upon completion a copy of the as-builts be submitted digitally so that the WRIS may be updated.

Kentucky River Area Development District
Angelia Hall

KRADD has no concerns with the project as proposed.

KY Heritage Council
Yvonne Sherrick

To receive a review from the KY Heritage Council/State Historical Preservation Office (SHPO) you must follow the instructions located on their website at http://www.heritage.ky.gov/siteprotect/. There you will find the required documents for the Section 106 Review and Compliance for 36 CFR Part 800. This Section 106 submission process to SHPO will assist applicants and agencies in providing the appropriate level of information to receive comments from SHPO. If you have any questions please contact Yvonne Sherrick, Administrative Specialist III, (502) 564-7005, Ext. 113, yvonne.sherrick@ky.gov.

Please note: If your project is funded through Transportation Alternative (TAP), Transportation Enhancements (TE), Congestion, Mitigation, Air Quality (CMAQ), or Safe Routes to School (SRTS) you will need to send this information to Michael Jones, Historic Preservation Program Administrator with the Kentucky Transportation Cabinet via email MichaelR.Jones2@ky.gov or hard copy to Michael Jones, Office of Local Programs, KY Transportation Cabinet, 200 Mero Street Frankfort, KY 40622. Do not send materials directly to SHPO if your project involves funding from these four sources as it will cause delays in the review process. Michael Jones will consult directly with the SHPO on projects with these funding sources to complete the Section 106 review.

KY. Division of Water
Kurtis Spears

The proposed work is endorsed by the Groundwater Section of the Watershed Management Branch. However, there are domestic groundwater water well users in the vicinity of the proposed work. It is our recommendation that site be made aware of the requirements of 401 KAR 5:037 and the need to develop a Groundwater Protection Plan(GPP) for the protection of groundwater resources within that area. Re: City of Hindman Waterline Extension Project, Knott Co., KY

Dear Ms. Napier:

Our review indicates that the proposed project will not impact any properties or sites that are listed in or eligible for the National Register of Historic Places. The proposed project should not require an archaeological survey or cultural historic survey.

In the event that human remains are encountered during project activities, all work should be immediately stopped in the area. The area should be cordoned off, and in accordance with KRS 72.020 the county coroner and local law enforcement must be contacted immediately. Upon confirmation that the human remains are not of forensic interest, the unanticipated discovery must be reported to the Kentucky Heritage Council.

Should the project plans change, or should additional information become available regarding cultural resources or citizens' concerns regarding impacts to cultural resources, please submit that information to our office as additional consultation may be warranted. Should you have any questions, feel free to contact Nick Laracuente of my staff at nicolas.laracuente@ky.gov.

Sincerely,

Craig A. Potts,  
Executive Director and  
State Historic Preservation Officer

Frankfort, KY 40601

RE: City of Hindman Waterline Extension Project

Dear Mr. Potts:

The City of Hindman is in the process of conducting an environmental review pursuant to the State Environmental Review Process for the Economic Development Administration. The purpose of the review is to assess the environmental impacts of the City of Hindman Waterline Extension Project located in Knott County, Hindman, Kentucky.

Enclosed is the KHC cover sheet for Section 106 Review and Compliance containing project information. Also enclosed you will find project maps and photographs of the project site including anything over 50 years of age visible from the project site. A copy of the Project Profile is enclosed which contains detailed project description/information.

Any ground disturbance with this project will occur in highway right of way.

Due to the nature of the project, we feel that there will be no effect on properties eligible for the Historic Register or on any historical structures. Please advise us of any present concerns your office may have related to possible effects of the above-mentioned project.

We would appreciate a response within 30 days, if possible. If you need any further information or wish to discuss the project, please feel free to contact me at (606) 436-3158 or by email at lisa@kradd.org.

Sincerely,

Lisa S. Napier  
Community and Economic Development Specialist

HINDMAN WATERLINE EXTENSION PROJECT

Clarence Francis House – Log House

Clarence Francis current home – Log house sets behind this house
Frances Hollow Road – Road where Clarence Francis House sets

Upper Mill Creek Road
Project Description
City of Hindman Water Line Extension Project

This project will extend water to 68 residences located across six currently unserved roads adjacent to the City of Hindman. Many of these residents are purchasing drinking water due to different circumstances including but not limited to summer droughts and holidays, as well as having polluted well water. The project will:

- Install a hydropneumatic pump and approximately 4200 LF of 4" PVC and 500 LF of 2" PVC along Martin Branch to serve 10 households.
- Install approximately 2,050 LF of 4" PVC and 500 LF of 2" PVC along Triplett Branch Road to serve 6 households.
- Install a hydropneumatic pump station and approximately 2,900 LF of 4" PVC and 750 LF of 2" PVC along Chimney Rock RD to serve 9 households.
- Install approximately 1,200 LF of 4" PVC and 250 LF of 2" PVC along Crimson Road to serve 7 households.
- Install approximately 8,450 LF of 4" PVC and 250 LF of 2" PVC along Upper Mill Creek to serve 30 households.
- Install approximately 650 LF of 4" PVC and 250 LF of 2" PVC along Charity Lane to serve 6 households.

Telemetry will be installed on the two hydropneumatic pump stations as well as upgrading the SCADA system wide on all existing tanks and pump stations as the system has become obsolete. All costs of SCADA have been incorporated into the ARC portion of the project.

The project will:

- 68 unserved households will have access to potable water supply.
- Installation of new water line – 21,950 LF (19,450 LF on 4" PVC and 2500 LF of 2" PVC).
- Installation of 2 hydropneumatic pump stations.
- Updated SCADA telemetry and office computer will result in more efficient system operations.
Drinking Water Project Profile

Legal Applicant: City of Hindman

Date Approved (AVMFC): 11-28-2018
Submitted By: KRADD
Primary County: Knott
Planning Unit: Knott
Multi-County: No
ECH Status: Approved
ADD VMVC Contact: Jennifer McIntosh

Project Description:
This project will extend water into several unserved areas adjacent to the City. The project will install approximately 4200 LF of 4" PVC and 500 LF of 2" PVC along Martin Branch to service 20 households. A hydropneumatic pump station will be required. Project will install approximately 2,050 LF of 4" PVC and 500 LF of 2" PVC to service 6 households on Tripllett Branch RD. Chimney Rock RD has the potential for 14 households to be served utilizing 2950 LF of 4" PVC and 750 LF of 2" PVC and hydropneumatic pump station. The project also includes 1,200 LF of 4" PVC and 250 LF of 2" PVC to service approximately 7 households at Crimson RD. Upper Mill Creek will have approximately 8,450 LF of 4" PVC and 250 LF of 2" PVC for its 30 households while Charity Lane will have approximately 650 LF of 4" PVC and 250 LF of 2" PVC for its 6 households. The SCADA in the system needs to be updated as it has become obsolete. This will be done system wide to all tanks and pump stations.

Need for Project:
Shortly describe how this project promotes public health or achieves and/or maintains compliance with the Clean Water Act or Safe Drinking Water Act:

Project will provide safe and reliable potable water to residents in the areas stated.

Project Alternatives:
Alternate A:
Phase the project into two separate phases.
Alternate B:
Allow KCWSD to serve customers, which would increase project costs due to adding interconnected meters.

Administrative Components:

☑ Planning ☑ Design ☑ Construction ☐ Management

Regionalization Components:

Public Water Systems Eliminated:

☐ this project includes the elimination of public water system(s) through merger or acquisition.

Water Treatment Plants Eliminated:

☐ This project includes the elimination of water treatment plant(s) through interconnect(s).

Supplementation of Raw Water Supply:

☐ This project includes supplementing the existing raw water supply.

Supplementation of Potable Water Supply:

☐ This project includes supplementing the existing potable water supply.

Emergency Only Water Supply:

☐ This project provides emergency only water supply.
Water Source Protection:

☐ This project includes land acquisition for water source protection.

Water Treatment Components:

☐ This project includes water treatment components

Treatment Activities:

☐ This project includes a new water treatment plant.

☐ This project includes an expansion of an existing water treatment plant.

☐ This project includes rehabilitation of an existing water treatment plant.

☐ This project includes upgrades to an existing water treatment plant.

☐ This project includes emergency power generators for treatment activities.

☐ This project includes redundant treatment processes.

Acute Public Health Risk:

☐ This project includes infrastructure options to meet Cryptosporidium removal/inactivation requirements.

☐ This project includes infrastructure options to meet CT inactivation requirements.

Chronic Public Health Risk:

☐ This project includes treatment modifications to meet the Disinfectants/Disinfection Byproducts Rule at the water treatment plant.

☐ This project will provide treatment modifications for VOCs, ICCs, SOC, or Radionuclides.

Secondary Contaminants:

☐ This project includes treatment modifications to address Secondary Contaminants.

Security:

☐ This project includes security components for water treatment facilities.

Water Distribution and Storage:

☐ This project includes water distribution and/or storage components.

Water Line Extensions:

☐ This project includes water line extension(s).

Length of extensions: 21,680 LF

Number of new connections: 83
Redundancy Components:

☐ This project includes emergency power generators for distribution and/or storage activities.

Number of units provided: 0

☐ This project includes redundant distribution and/or storage processes.

Finished Water Quality:

☐ This project includes infrastructure to address inadequate water turnover and disinfection byproducts (DBPs).

☐ This project includes infrastructure to address inability to maintain disinfection residual.

Water Line Replacement:

☐ This project replaces problem water lines (breaks, leaks, or restrictive flows due to age), water lines consisting of lead and/or asbestos-cement (AC), and/or inadequately sized water lines.

Water Storage and Pressure Components:

☐ This project includes the construction of new water tank(s).

☐ This project includes the replacement of existing water tank(s).

☐ This project includes the rehabilitation of existing water tank(s).

☐ This project includes the construction of new pump station(s).

☐ This project includes the rehabilitation of existing pump station(s).

Security:

☐ This project includes security components for water distribution infrastructure.

Sustainable Infrastructure - Green Infrastructure:

Green stormwater infrastructure includes a wide array of practices at multiple scales that manage wet weather and that maintains and restores natural hydrology by infiltrating, evapotranspiring and harvesting and using stormwater. On a regional scale, green infrastructure is the preservation and restoration of natural landscape features, such as forests, floodplains, and wetlands, coupled with policies such as infill and redevelopment that reduce overall imperviousness in a watershed. On the local scale, green infrastructure consists of site and neighborhood-specific practices, such as:

<table>
<thead>
<tr>
<th>Component</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bioretention</td>
<td>$0</td>
</tr>
<tr>
<td>Trees</td>
<td>$0</td>
</tr>
<tr>
<td>Green Roofs</td>
<td>$0</td>
</tr>
<tr>
<td>Permeable Pavement</td>
<td>$0</td>
</tr>
<tr>
<td>Cisterns</td>
<td>$0</td>
</tr>
</tbody>
</table>

Total Green Infrastructure Cost: $0

There are no Green Infrastructure components specified for this project.
### Sustainable Infrastructure - Water Efficiency:

The use of improved technologies and practices to deliver equal or better services with less water. Water efficiency encompasses conservation and reuse efforts, as well as water loss reduction and prevention, to protect water resources for the future. Examples include:

<table>
<thead>
<tr>
<th>Component</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Installing or retrofitting water efficient devices such as plumbing fixtures and appliances (toilets, showerheads, urinals).</td>
<td>$0</td>
</tr>
<tr>
<td>Installing any type of water meter in previously unmetered areas (can include backflow prevention if in conjunction with meter replacement).</td>
<td>$0</td>
</tr>
<tr>
<td>Replacing existing broken/malfunctioning water meters with AMR or smart meters, meters with leak detection, backflow prevention.</td>
<td>$0</td>
</tr>
<tr>
<td>Retrofitting/adding AMR capabilities or leak equipment to existing meters.</td>
<td>$0</td>
</tr>
<tr>
<td>Conducting water utility audits, leak detection studies, and water use efficiency baseline studies, which are reasonably expected to result in a capital project or in a reduction in demand to alleviate the need for additional capital investment.</td>
<td>$0</td>
</tr>
<tr>
<td>Developing conservation plans/programs reasonable expected to result in a water conserving capital project or in a reduction in demand to alleviate the need for capital investment.</td>
<td>$0</td>

<tr>
<td>Recycling and water reuse projects that replace potable sources with non-potable sources (Gray water, condensate, and wastewater effluent reuse systems, extra treatment or distribution costs associated with water reuse).</td>
<td>$0</td>
</tr>
<tr>
<td>Retrofit or replacement of existing landscape irrigation systems to more efficient landscape irrigation systems.</td>
<td>$0</td>
</tr>
<tr>
<td>Water meter replacement with traditional water meters.*</td>
<td>$0</td>
</tr>
<tr>
<td>Distribution pipe replacement or rehabilitation to reduce water loss and prevent water main breaks.*</td>
<td>$0</td>
</tr>
<tr>
<td>Storage tank replacement/rehabilitation to reduce water loss.*</td>
<td>$0</td>
</tr>
<tr>
<td>New water efficient landscape irrigation system, where there currently is not one.*</td>
<td>$0</td>
</tr>
</tbody>
</table>

**Total Water Efficiency Cost:** $0

* Indicates a business case may be required for this item.

**There are no Water Efficiency components specified for this project.**

### Sustainable Infrastructure - Energy Efficiency:

Energy efficiency is the use of improved technologies and practices to reduce the energy consumption of water projects, use energy in a more efficient way, and/or produce/utilize renewable energy. Examples include:

<table>
<thead>
<tr>
<th>Component</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Renewable energy projects, which are part of a public health project, such as wind, solar, geothermal, and micro-hydroelectric that provides power to a utility.</td>
<td>$0</td>
</tr>
<tr>
<td>Utility-owned or publicly-owned renewable energy projects.</td>
<td>$0</td>
</tr>
<tr>
<td>Utility energy management planning, including energy assessments, energy audits, optimization studies, and sub-metering of individual processes to determine high energy use areas.</td>
<td>$0</td>
</tr>
<tr>
<td>Energy efficient retrofits, upgrades, or new pumping systems and treatment processes (including variable frequency drives (VFDs)).*</td>
<td>$0</td>
</tr>
<tr>
<td>Pump refurbishment to optimize pump efficiency.*</td>
<td>$0</td>
</tr>
<tr>
<td>Projects that result from an energy efficient related assessment.*</td>
<td>$0</td>
</tr>
<tr>
<td>Projects that cost effectively eliminate pumps or pumping stations.*</td>
<td>$0</td>
</tr>
<tr>
<td>Projects that achieve the remaining increments of energy efficiency in a system that is already very efficient.*</td>
<td>$0</td>
</tr>
<tr>
<td>Upgrade of lighting to energy efficient sources.*</td>
<td>$0</td>
</tr>
<tr>
<td>Automated and remote control systems (SCADA) that achieve substantial energy savings.*</td>
<td>$0</td>
</tr>
</tbody>
</table>

**Total Energy Efficiency Cost:** $0

* Indicates a business case may be required for this item.

**There are no Energy Efficiency components specified for this project.**

</tr>
<tr>
<td>Plans to improve water quantity and quality associated with water system technical, financial, and managerial capacity.</td>
<td>$0</td>
</tr>
<tr>
<td>Source water protection planning (delineation, monitoring, modeling).</td>
<td>$0</td>
</tr>
<tr>
<td>Planning activities to prepare for adaptation to the long-term effects of climate change and/or extreme weather.</td>
<td>$0</td>
</tr>
<tr>
<td>Utility sustainability plan consistent with EPA's sustainability policy.</td>
<td>$0</td>
</tr>
<tr>
<td>Greenhouse gas inventory or mitigation plan and submission of a GHG inventory to a registry as long as it is being done for an SRF eligible facility.</td>
<td>$0</td>
</tr>
<tr>
<td>Construction of US Building Council LEED certified buildings, or renovation of an existing building.</td>
<td>$0</td>
</tr>
<tr>
<td>Projects that significantly reduce or eliminate the use of chemicals in water treatment.*</td>
<td>$0</td>
</tr>
<tr>
<td>Treatment technologies or approaches that significantly reduce the volume of residuals, minimize the generation of residuals, or lower the amount of chemicals in the residuals.*</td>
<td>$0</td>
</tr>
<tr>
<td>Trenchless or low impact construction technology.*</td>
<td>$0</td>
</tr>
<tr>
<td>Using recycled materials or re-using materials on-site.*</td>
<td>$0</td>
</tr>
<tr>
<td>Educational activities and demonstration projects for water or energy efficiency (such as rain gardens).*</td>
<td>$0</td>
</tr>
<tr>
<td>Projects that achieve the goals/objectives of utility asset management plans.*</td>
<td>$0</td>
</tr>
</tbody>
</table>

Total Environmentally Innovative Cost: $0

* Indicates a business case may be required for this item.

There are no Environmentally Innovative components specified for this project.

Sustainable Infrastructure - Asset Management:
If a category is selected, the applicant must provide proof to substantiate claims. The documents must be submitted to Anshu Singh (Anshu.Singh@ky.gov) for CW projects

RE: City of Hindman – Hindman Waterline Extension Project

Dear Richard:

The City of Hindman has been approved for an Appalachian Regional Commission Grant for the above referenced project. The project will extend water into an unserved area of Knott County, Kentucky. In doing so, 68 households along Martin Branch Road, Triplett Branch Road, Chimney Rock Road, Crimson Road, Upper Mill Road, and Charity Road will have access to new potable water service.

The Kentucky River Area Development District has been asked to undertake an environmental review of this project to ascertain the impact of the proposed activities. Any ground disturbance with this project will be in highway right-of-way. I would appreciate your office reviewing this project in relation to its potential impact(s) on any historic properties in the project area that may have religious and cultural significance to your tribe. I have enclosed a project location map and project description for your reference.

Your comments may address beneficial or adverse impacts or both. I would appreciate receiving your comments in the near future. I will assume if I have not received a response from you within 30 days of this letter, that your office does not anticipate any negative environmental impacts from this project, per your area(s) of responsibility. Responses can be sent by email to: lisa@kradd.org. Thank you, for your time and assistance.

Sincerely,

Lisa Napier  
Community and Economic Development Specialist

Enclosures
Project Description
City of Hindman Water Line Extension Project

This project will extend water to 68 residences located across six currently unserved roads adjacent to the City of Hindman. Many of these residents are purchasing drinking water due to different circumstances including but not limited to summer droughts and holidays, as well as having polluted well water. The project will:

- Install a hydropneumatic pump and approximately 4200 LF of 4" PVC and 500 LF of 2" PVC along Martin Branch to serve 10 households.
- Install approximately 2,050 LF of 4" PVC and 500 LF of 2" PVC along Triplett Branch Road to serve 6 households.
- Install a hydropneumatic pump station and approximately 2,900 LF of 4" PVC and 750 LF of 2" PVC along Chimney Rock RD to serve 9 households.
- Install approximately 1,200 LF of 4" PVC and 250 LF of 2" PVC along Crimson Road to serve 7 households.
- Install approximately 8,450 LF of 4" PVC and 250 LF of 2" PVC along Upper Mill Creek to serve 30 households.
- Install approximately 650 LF of 4" PVC and 250 LF of 2" PVC along Charity Lane to serve 6 households.

Telemetry will be installed on the two hydropneumatic pump stations as well as upgrading the SCADA system wide on all existing tanks and pump stations as the system has become obsolete. All costs of SCADA have been incorporated into the ARC portion of the project.

The project will:

- 68 unserved households will have access to potable water supply.
- Installation of new water line – 21,950 LF (19,450 LF on 4" PVC and 2500 LF of 2" PVC).
- Installation of 2 hydropneumatic pump stations.
- Updated SCADA telemetry and office computer will result in more efficient system operations.
Exhibit 3
Floodplain and Wetlands Correspondence
Maps and Data
Section 3. Additional Charges.

(A) A water connection fee of $720.00 shall be charged for new customers with 3/4 inch water meter. The customer shall also be required to obtain a water permit from the local Health Department. This permit must be presented to the City of Hindman Water and Sewer Department before hook-up will be considered. Meters larger than 3/4 inch shall be at actual cost.

(B) A deposit in the amount of $100.00 shall be required for all water customers. Deposits may be waived for a customer showing satisfactory credit or payment history with the following criteria being considered: (1) Previous history with the utility; (2) The customer has no previous history with the utility; (3) The customer may be presented by the customer as evidence of good credit; (4) Whether the customer has an established income or a line of credit; (5) Length of time the customer has resided in the area; (6) Whether the customer owns the property to be served; and (7) Whether another customer with a good payment history is willing to sign as guarantor for an amount equal to the required deposit. When a customer terminates service the deposit will be refunded after the account is paid in full. If the account has a balance the deposit will be applied to account.

(C) A meter turn-on charge of $35.00 will be assessed for new service turn-ons, seasonal turn-ons, temporary service, or transfer of service. The charge will not be made for initial installation of service where a meter connection/turn-on charge is applicable.

(D) Customers will be entitled to a maximum of only one water adjustment per year. The customer's adjustment will be based on two components. The first step will be to calculate the customer's average monthly usage over a twelve-month period. The second step will be to deduct the customer's average monthly usage (as calculated above) from the total amount of water that passed through the meter. The usage calculated in step one will be billed at the utility's regular rates, while the remaining usage will be charged at the per thousand gallon wholesale rate charged by our supplier plus 30% conveyance charges. All water passing through the meter must be accounted and paid for by the customer. Therefore, the customer will owe an amount of their billing change for the remainder of the water that passed through the meter.

(E) All customers who do not pay their bill after being provided with a cut off notice will have their service suspended for a fee of $35.00. Reconnection fees will be charged at $75.00 upon reconnection.

FLOODPLAIN AND WETLAND NOTICE OF EXPLANATION

Activity in a 100-Year Floodplain

To: All Interested Agencies all Federal, State, and Local Groups and Individuals

This is to give notice that the City of Hindman under 24 CFR Part 58 has conducted an evaluation as required by Executive Order 11800 and/or 11990, in accordance with HUD regulations at 24 CFR 55.20 Subpart C Procedures for Making Determinations on Floodplain Management, to determine the potential effect that its project in the floodplain and wetland will have on the human environment for Hindman Waterline Extension Project under WX21115011. The proposed project is located at multiple locations in the City of Hindman, Knott County, Kentucky. The purpose of this project is to extend water into an unsecured area of Knott County, Kentucky. In doing so, 88 households along Martin Branch Road, Tipton Branch Road, Chimney Rock Road, Crimson Road, Upper Mill Road, and Charity Road will have access to new potable water service.

The City of Hindman has considered the following alternatives and mitigation measures to be taken to minimize adverse impacts and to restore and preserve natural and beneficial values: The City of Hindman evaluated alternatives. The first option was to phase the project into two separate phases. This option was not feasible due to budget limits. The second option was to allow KCWSD to serve customers. This option was not feasible due to the increased project costs due to adding interconnect meters. The third option was to construct project as designed. Part of the project may be in the 100-year floodplain as designated by the September 16, 2015 FEMA Floodplain Maps, with very minimal impacts to the floodplain areas.

The City of Hindman has re-evaluated the alternatives to building in the floodplain and has determined that it has no practicable alternative. Environmental files that document compliance with steps 3 through 6 of [Executive Order 11998 and/or 11990], are available for public inspection, review, and copying upon request at the times and location delineated in the last paragraph of this notice for receipt of comments. This activity will have no significant impact on the environment for the following reasons:

The construction of the Hindman Waterline Extension Project in the floodplain areas will disturb very minimal surface area during construction. The construction of the project involves installation of two (2) new hydropneumatics pump stations and 21,950 LF (19,450 LF on 4th PVC and 2,500 LF of 2nd PVC) new water lines will be installed. Telemetry will be installed on the two hydropneumatics pump stations as well as upgrading the SCADA system wide on all existing tanks and pump stations as the system has become obsolete. Once completed the project will not impede the floodplain. This is the most economical and least environmentally impacting alternative considered.

Written comments must be received by the Kentucky River Area Development District at the following address on or before May 15, 2020: Kentucky River Area Development District, 841 North Main Street Hazard, KY 41701 and (606) 436-3158, Attention: Lisa Napier, Community and Economic Development Specialist, during the hours of 8am-4:30pm Monday through Friday. Comments may also be submitted via email at lisa@kraddd.org.

606/436-3158

The surface area proposed under this renewal application is owned by Kentucky Fuel Corporation.

The renewal application has been filed for public inspection at the Department for Natural Resources, Hazard Regional Office, 556 Village Lane, Hazard, Kentucky 41701. Written comments or objections must be filed with the Director, Division of Mine Permits, 300 Sowers Blvd, 2nd Floor, Frankfort, Kentucky 40601-4321.

KNOX COUNTY BOARD OF EDUCATION
Kim W. King, Superintendent
Hindman, Kentucky 41822
758-3153

JOB POSTING

Date Opened: April 22, 2020
Date Closed: May 7, 2020
Title of Position: Primary K-5 Teacher
Location: Cordia School
Salary Range: According to Salary Schedule
Contact Person: Kim King, Supt. 785-3153
Brief Job Description: Available upon request
Minimum Requirements: Clear & satisfactory criminal records check, Drug Screen, KDE Certificate, Immediate availability
Additional Job Requirements: As assigned by Kim King, Superintendent

Applicant must submit an updated, signed application to the Superintendent of the Knox County Board of Education no later than 4 p.m. May 7, 2020, to be considered for an interview. Applicant will be notified for an interview as soon as arrangements have been completed. Knott County Board of Education does not discriminate on the basis of race, color, national origin, age, religion, marital status, sex, or handicap in employment, educational programs, or activities as set forth in Title IX & VI in Section 504.

Re: City of Hindman-Hindman Waterline Extension Project-SERO 2020-17

Dear Ms. Napier,

The Energy and Environment Cabinet serves as the state clearinghouse for review of environmental documents generated pursuant to the National Environmental Policy Act (NEPA). Within the Cabinet, the Commissioner’s Office in the Department for Environmental Protection coordinates the review for Kentucky state agencies. We received your letter requesting an environmental review for this project. We have reviewed the document and provided comments below.

Division of Water

Water Infrastructure Branch:
There are no objections to the proposed project. Plans and specifications along with hydraulic analysis of the proposed project (including pump curves and its design information etc.) must be submitted to the DOW’s Water Infrastructure Branch by a registered professional engineer in Kentucky. The applicant must receive a written approval from the DOW prior to the beginning of the construction. Questions should be directed to Abbas Pourghasemi, Water Infrastructure Branch, (502) 782-7041, Abbas.Pourghasemi@ky.gov.

As the system expands, the need for a second certified distribution operator is even more imperative. Additionally, as of the most recent Sanitary Survey (March 2018), both water purchase contracts were expired and new contracts had not yet been agreed upon. Ensure the maximum contracted monthly water purchase amounts will allow for this expansion. If not already signed, consider including water quality standards at the master meters within the purchase contracts, as well. System received a non-significant deficiency as a result of the aforementioned survey. A response was due June 21, 2018 and has not yet been received by the Division. This must be addressed immediately. The system was also lacking managerial and financial capacity. Therefore, recommendations listed within the Sanitary Survey results letter (dated May 7, 2018), which have not already been implemented, are still highly advised.
Questions should be directed to Jennifer Taimi, Water Infrastructure Branch, (502) 782-7087, Jennifer.Taimi@ky.gov.

**Water Quality Branch:**
Best management practices should be utilized to reduce runoff from project construction activities into nearby waters. Questions should be directed to Andrea Fredenburg, Water Quality Branch, (502) 782-6950, Andrea.Fredenburg@ky.gov.

**Water Resources Branch:**
Only the Martin Branch portion of the proposed project is within the floodplain. For pipeline stream crossings that are not covered under 401 KAR 4:050, a Kentucky DOW Application for Permit to Construct Across or Along a Stream must be submitted. Questions should be directed to Shawn Hokanson, Floodplain Management Section, (502) 782-6977, Shawn.Hokanson@ky.gov.

**Watershed Management:**
This proposed project is not within a designated Source Water Protection Area. This proposed project may potentially add approximately 0.016-0.020 Million Gallons per Day (MGD) of water usage demand. Knott County Water and Sewer District should have the capacity to provide the water demand associated with this project for Hindman Municipal Water Works to purchase. Questions should be directed to Chloe Brantley, Watershed Management Branch, (502) 782-6898, Chloe.Brantley@ky.gov.

The proposed work is endorsed by the Groundwater Section of the Watershed Management Branch. However, there are domestic groundwater water well users in the vicinity of the proposed work. It is our recommendation that site be made aware of the requirements of 401 KAR 5:037 and the need to develop a Groundwater Protection Plan (GPP) for the protection of groundwater resources within that area. Questions should be directed to Adam Nolte, Groundwater Section, (502) 782-1312, Adam.Nolte@ky.gov or Kurtis Spears, Groundwater Section, (502) 782-7119, Kurtis.Spears@ky.gov.

**Field Operations Branch:**
Endorse. Questions should be directed to Daniel Fraley, Field Operations Branch, (606) 783-8655, Daniel.Fraley@ky.gov.

**Enforcement Branch:**
The Division of Enforcement does not object to the project proposed by the applicant. Questions should be directed to Tim Harrod, Division of Enforcement, (502) 782-6858, Timothy.Harrod@ky.gov.

**Division of Waste Management**
UST Branch records indicate no underground storage tank site issues identified within the project impact area. If any UST’s are encountered during the project construction they should be reported to KDWM. Any UST issues or questions should be directed to the UST Branch.
Superfund Branch records indicate the following superfund site issues identified within the project impact area:

Columbia Gas - Knott Co

Any superfund issues or questions should be directed to the Superfund Branch.
Solid Waste Branch records indicate no active or historic landfill sites within the project impact area. Any solid waste issues or questions should be directed to the Solid Waste Branch.

Hazardous Waste Branch records indicate no hazardous waste issues identified within the project impact area. Any hazardous waste issues or questions should be directed to the Hazardous Waste Branch.

RLA Branch records indicate no RLA tracked open dumps within the project impact area. Any questions or issues should be directed to the RLA Branch.

All solid waste generated by this project must be disposed of at a permitted facility.

If asbestos, lead paint and/or other contaminants are encountered during this project contact the Division of Waste Management for proper disposal and closure.

The information provided is based on those facilities or sites that KDWM currently has in its database. If you would like additional information on any of these facilities or sites, you may contact the file room custodian at (502) 782-6357. Please keep in mind additional locations of releases, potential contamination or waste facilities may be present but unknown to the agency. Therefore, it is recommended that appropriate precautions be taken during construction activities. Please report any evidence of illegal waste disposal facilities and releases of hazardous substances, pollutants, contaminants or petroleum to the 24-hour Environmental Response Team at 1-800-928-2380.

**Division for Air Quality**

401 KAR 63:010, Fugitive Emissions, states that no person shall cause, suffer, or allow any material to be handled, processed, transported, or stored without taking reasonable precaution to prevent particulate matter from becoming airborne. Additional requirements include the covering of open bodied trucks, operating outside the work area transporting materials likely to become airborne, and that no one shall allow earth or other material being transported by truck or earth-moving equipment to be deposited onto a paved street or roadway. Please note the Fugitive Emissions Fact Sheet located at https://eec.ky.gov/Environmental-Protection/Air/Documents/Fugitive%20Dust%20Fact%20Sheet.pdf

401 KAR 63:005 states that open burning shall be prohibited except as specifically provided. Open Burning is defined as the burning of any matter in such a manner that the products of combustion resulting from the burning are emitted directly into the outdoor atmosphere without passing through a stack or chimney. However, open burning may be utilized for the expressed purposes listed on the Open Burning Brochure located at https://eec.ky.gov/Environmental-Protection/Air/Pages/Open-Burning.aspx

The Division would like to offer the following suggestions on how this project can help us stay in compliance with the NAAQS. These air quality control strategies are beneficial to the health of citizens of Kentucky.

* Utilize alternatively fueled equipment.
• Utilize other emission controls that are applicable to your equipment.
• Reduce idling time on equipment.

The Division also suggests an investigation into compliance with applicable local government regulations.

**Kentucky Nature Preserves**

Your project might have the potential of impacting federally or state listed species and natural communities. Go to the Kentucky Biological Assessment Tool (kynaturepreserves.org) to obtain a Standard Occurrence Report for information regarding listed species known within your project area. The report will also provide information on public and private conservation lands, areas of biodiversity significance, and other natural resources in your project area for which the Office of Kentucky Nature Preserves maintains data.

This review is based upon the information that was provided by the applicant. An endorsement of this project does not satisfy, or imply, the acceptance or issuance of any permits, certifications or approvals that may be required from this agency under Kentucky Revised Statutes or Kentucky Administrative Regulations. Such endorsement means this agency has found no major concerns from the review of the proposed project as presented other than those stated as conditions or comments. If you should have any questions, please contact me at (502) 782-0863 or e-mail Louanna.Aldridge@ky.gov.

Sincerely,

[Signature]
