TRANSPORTATION PLANNING 2019 PRIORITIZATION

The KYTC developed a more data-driven, objective and collaborative approach to determine the state's transportation funding priorities. Strategic Highway Investment Formula for Tomorrow (SHIFT) is a prioritization model that will bring balance and dependability to Kentucky's over-programmed highway plan.

SHIFT uses quantitative data such as crashes, fatalities, traffic volumes, delays, employment to assess the benefits of planned projects and compare them to each other. The program also includes collaboration with local leaders throughout the process to help shape regional funding priorities. Through this collaboration, projects were selected for prioritization by being sponsored at the regional or Area Development District (ADD) level, Highway District Office (HDO) level and Metropolitan Planning Organization (MPO) level. KRADD held local meetings to determine projects to sponsor.

The projects selected for regional sponsorship were submitted to the KYTC Central Office Planning and loaded into the SHIFT formula. Regional lists were provided, not selected through the statewide process. The projects were scored in the SHIFT regional model, which used weighted values for data available: safety, asset management, congestion, freight, benefit/cost ratio, District and Local (ADD/MPO) priorities. Twenty-five (25%) of the projects on the regional lists were then selected by the Regional Transportation Committee to receive 15 priority points. These BOOST projects are highlighted on the following pages. Projects not selected received zero points. Projects identified to receive priority points met the selection criteria identified by the prioritization plans developed by each District and ADD.

The KRADD rankings are on the following pages. A complete listing of projects and maps for the KRADD region will be provided upon request.

WATER AND WASTEWATER FY 2020 PROJECT RANKINGS

The Water Management Council met in October 2019 to prioritize water and wastewater projects for the KRADD region. The WMC selected 34 water and 31 wastewater projects that were of the most concern to the region based on Project Type, Compliance with Enforcement Action, Economic Stimulation, Financial/Funding Status, Project Status, County Ranking, Inflow and Infiltration, Water Loss and Regional Importance/Project Delivery.

A complete listing of projects by county will be provided upon

request.
